Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

Document Printing

For best results, print this document in color, on letter size paper (8.5 x 11 in), double-sided. If using A4 paper (210 x 297 mm), configure the printer to scale the content accordingly.

Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Before You Begin

1. Before You Begin

What Is Included

- Ovation CYC 1 FC
- Seetronic® Powerkon® power cord
- Omega brackets with mounting hardware
- Quick Reference Guide

Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.

If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.

For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

Manual Conventions

Convention	Meaning
1–512	A range of values
50/60	A set of values of which only one can be chosen
<SET>	A button on the product's control panel
Settings	A product function or a menu option

Symbols

Symbol	Meaning
	Electrical warning. Not following these instructions may cause electrical damage to the product, accessories, or the user.
	Critical installation, configuration, or operation information. Not following these instructions may make the product not work, cause damage to the product, or cause harm to the operator.
	Important installation or configuration information. The product may not function correctly if this information is not used.
	Useful information.
	Any reference to data or power connections in this manual assumes the use of Seetronic® Powerkon® cables.
	The term “DMX” used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

FCC Compliance

This device complies with Part 15 Part B of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Expected LED Lifespan

Over time, use and heat will gradually reduce LED brightness. Clustered LEDs produce more heat than single LEDs, contributing to shorter lifespans if always used at full intensity. The average LED lifespan is 40,000 to 50,000 hours. To extend LED lifespan, maintain proper ventilation around the product, and limit the overall intensity.

Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

Mounting and Rigging

- The luminaire is intended for professional use only.
- This product is not intended for permanent installation.
- This product is for indoor use only! To prevent risk of fire or shock, do not expose this product to rain or moisture. (IP20)
- CAUTION: When transferring product from extreme temperature environments, (e.g. cold truck to warm humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Mount this product in a location with adequate ventilation, at least 20 in (50 cm) from adjacent surfaces.
- The luminaire should be positioned so that prolonged staring into the luminaire at a distance closer than 2.3m (230 cm) is not expected.
- Make sure there are no flammable materials within 0.2 m (20 cm) of this product while it is operating.
- When hanging this product, always secure to a fastening device using a safety cable.
- Never carry the product by the power cord.

Power and Wiring

- Make sure the power cord is not crimped or damaged.
- Always make sure you are connecting this product to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.
- Never connect this product to a dimmer pack or rheostat.
- Make sure to replace the fuse with another of the same type and rating.
- Never disconnect this product by pulling or tugging on the power cable.
- If the external flexible cable or cord of this luminaire is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or his service agent.
- The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is 113 °F (45 °C). Do not operate the product at higher temperatures.
- In the event of a serious operation problem, stop using this product immediately!

If your Chauvet product requires service, contact Chauvet Technical Support.

2. Introduction

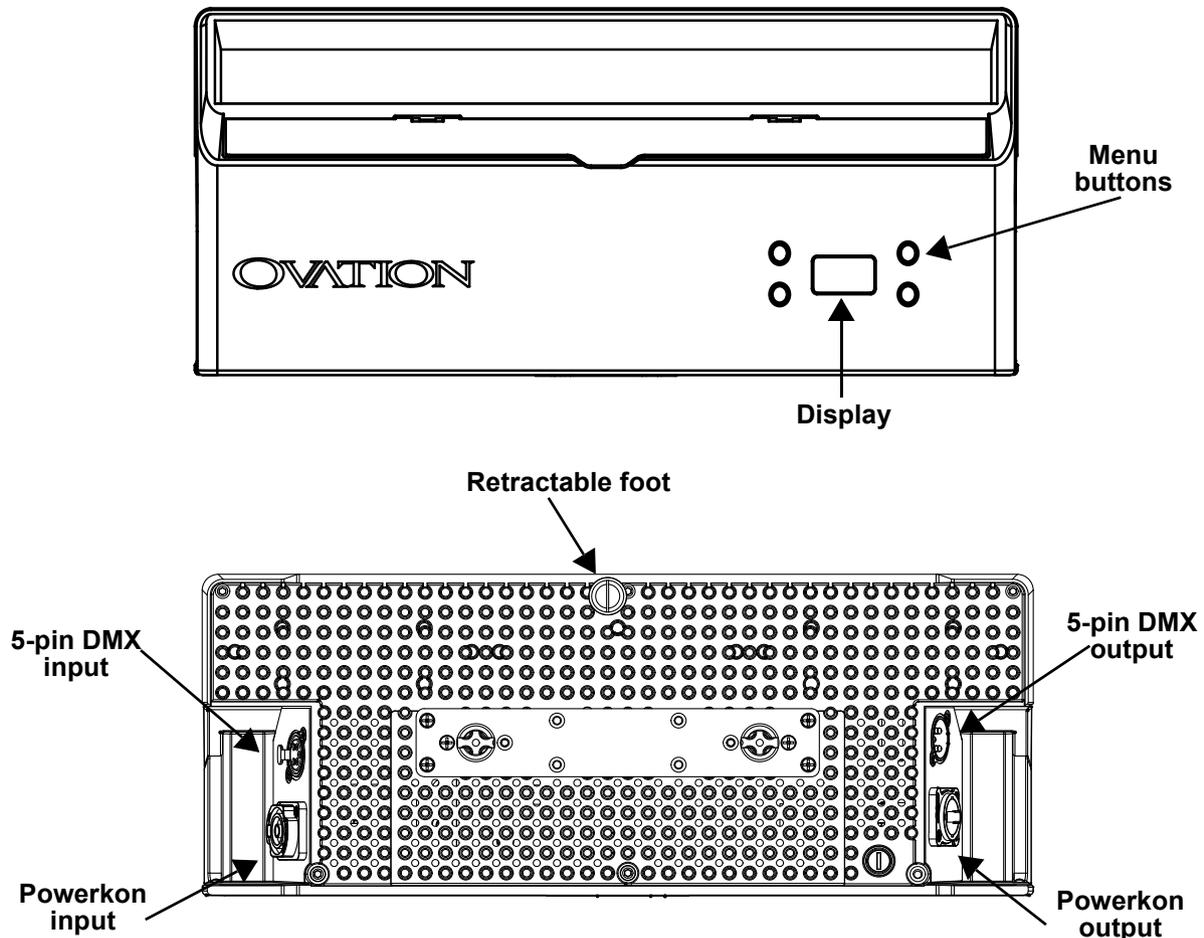

Description

The Ovation CYC 1 FC is a sleek, discreet, and lightweight cyclorama wash that delivers a wide, smooth field of light with significant reach. The unit is completely convection cooled, making it ideal for applications where silent operation is critical. The Ovation CYC 1 FC features the advanced RGBAL color-mixing system found in other Chauvet full-color Ovation units to render nearly any color with hyper-realism and saturation. Its low profile makes it perfect for use as a foot-light. The versatile fixture has an integrated kickstand and a glare shield that can adjust and shape its throw.

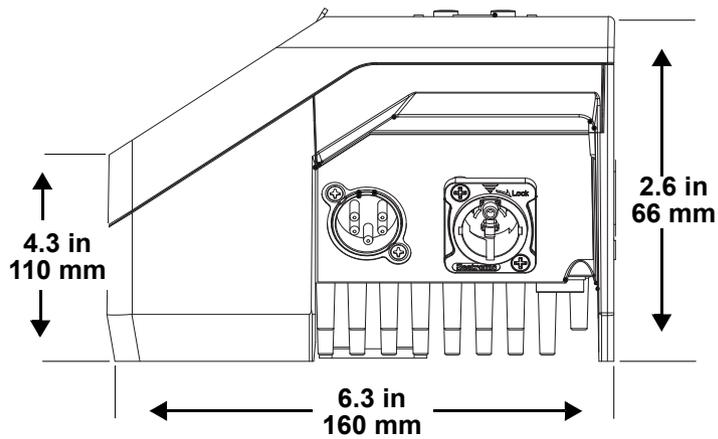

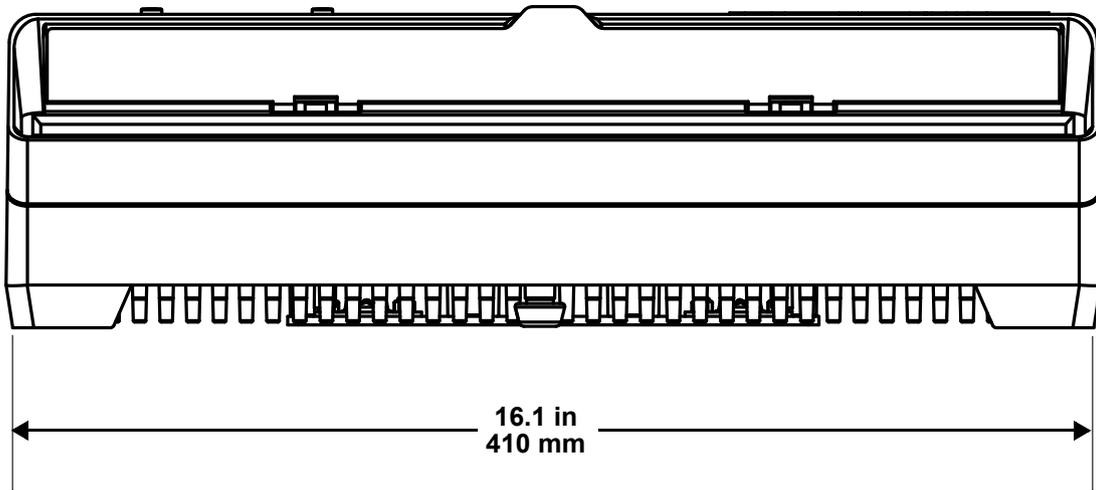

Features

- Low-profile and lightweight cyclorama wash or footlight fixture
- Display a full spectrum of hues with RGBAL LEDs for theater, film, and production
- Theater-ready with 16-bit dimming of master dimmer and individual colors
- Beam modification with built-in kickstand and adjustable glare shield
- Flat, even field of light with superior color mixing
- Virtual color wheel with color matched to popular gel colors and color temperature presets
- RDM (Remote Device Management) for added flexibility
- Adjustable PWM (Pulse Width Modulation) to avoid flickering on camera
- Silent operation for use in studio and theater applications

Product Overview

Product Dimensions

3. Setup

AC Power

Each Ovation CYC 1 FC has an auto-ranging power supply that works with an input voltage range of 100 to 240 VAC, 50/60 Hz. To determine the power requirements for each Ovation CYC 1 FC, refer to the label affixed to the product or to the [Technical Specifications](#) chart in this manual.

The listed current rating indicates the maximum current draw during normal operation. For more information, download Sizing Circuit Breakers from the Chauvet website: www.chauvetprofessional.com.

- **Always connect the product to a protected circuit (fuse or circuit breaker). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.**
- **To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.**

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a 0 to 100% switch.

AC Plug

The Ovation CYC 1 FC comes with a power input cord terminated with a Seetronic® Powerkon® A connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with the product has no plug or if the plug needs to be changed, use the table below to wire the new plug.

Connection	Wire (U.S.)	Wire (Europe)	Screw Color
AC Live	Black	Brown	Yellow or Brass
AC Neutral	White	Blue	Silver
AC Ground	Green/Yellow	Green/Yellow	Green

Power Linking

The product supports power linking. You can power link up to 12 Ovation CYC 1 FC products at 120 V, up to 21 products at 208 V, or up to 23 products at 230 V. The Ovation CYC 1 FC comes with a power input cord. Power-linking cables are available for purchase from Chauvet.

DMX Linking

The Ovation CYC 1 FC can be linked to a DMX controller using a 5-pin DMX connection. If using other DMX-compatible products with this product, each can be controlled individually with a single DMX controller.

DMX Personalities

The Ovation CYC 1 FC uses a 5-pin DMX data connection for its nine DMX personalities **1Ch, 3Ch, 5Ch, 7Ch, 10Ch, 12Ch, 13Ch, 16Ch**, and **HSV**:

- Refer to the [Introduction](#) for a brief description of each DMX personality.
- Refer to the [Operation](#) chapter to learn how to configure the Ovation CYC 1 FC to work in these personalities.
- The [DMX Values](#) section provides detailed information regarding the DMX personalities.

If you are not familiar with or need more information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

Master/Slave Connectivity

The Master/Slave mode allows a Ovation CYC 1 FC (the master) to control one or more Ovation CYC 1 FC products (the slaves) without a DMX controller. One Ovation CYC 1 FC becomes the master when running in auto show or VCW modes.

Each slave's control panel must be configured to operate in Slave mode. During Master/Slave operation, the slaves will operate in unison with the master.

DO NOT connect a DMX controller to products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master.

- The [Operation](#) section of this manual provides detailed instructions on how to configure the master and slaves.
- For more information about DMX standards or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Ovation CYC 1 FC supports RDM protocol that allows feedback to make changes to menu map options.

Setup

Mounting

Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes. For CHAUVET Professional line of mounting clamps, go to www.trusst.com/products.

Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

Rigging

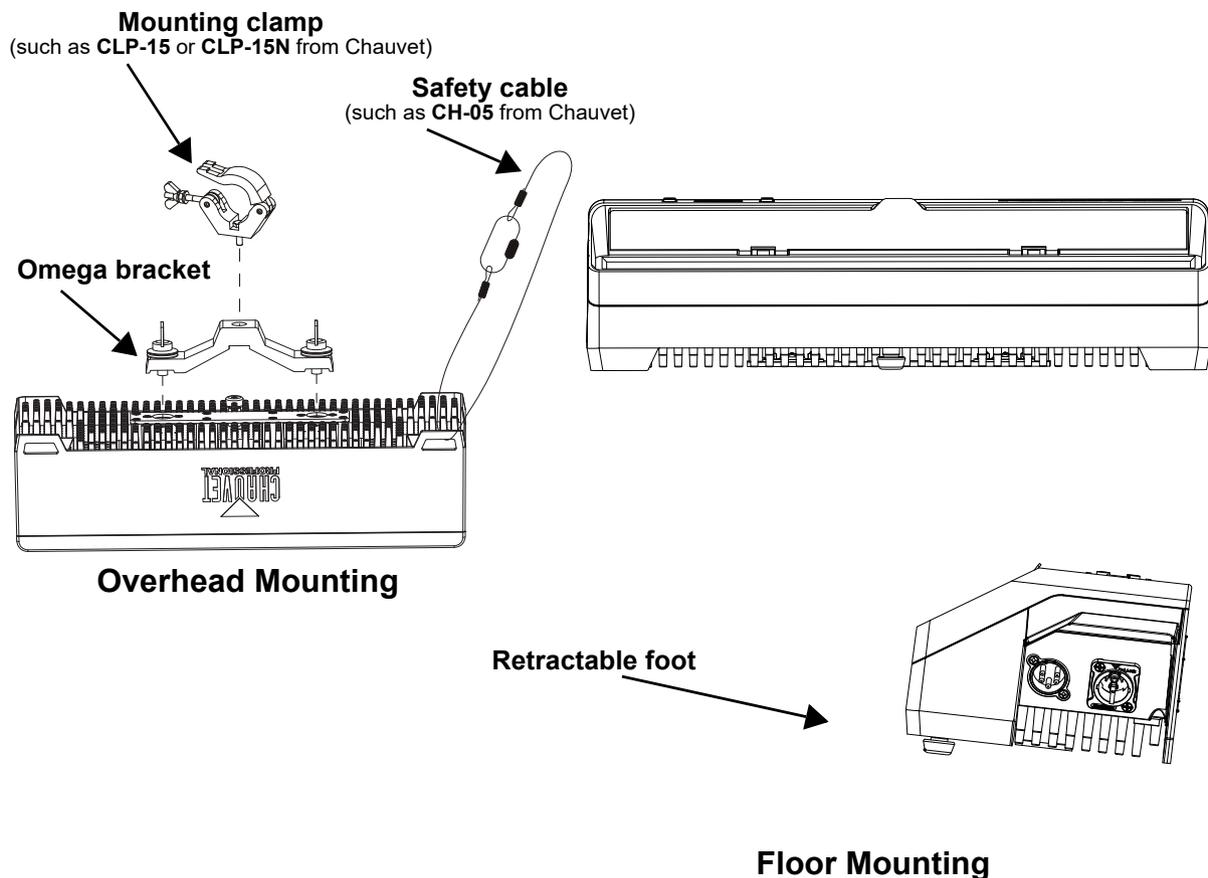

Chauvet recommends using the following general guidelines when mounting this product:

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which you are mounting the product can support the product's weight. See the [Technical Specifications](#) for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power-linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

Procedure

The Ovation CYC 1 FC comes with a double-bracketed yoke to which mounting clamps can be attached for hanging or simply use as a floor stand. Mounting clamps are sold separately. Make sure the clamps are capable of supporting the weight of this product. Use at least one mounting point per product. For the CHAUVET Professional line of mounting clamps, go to www.trusst.com/products.

Mounting Diagram

4. Operation

Control Panel Operation

Button	Function
<MENU>	Exits from the current menu or function
<ENTER>	Enables the currently displayed menu or sets the currently selected value in to the current function
<UP>	Navigates upward through the menu list or increases the numeric value when in a function
<DOWN>	Navigates downward through the menu list or decreases the numeric value when in a function

Control Options

Set the Ovation CYC 1 FC starting address in the 001-512 DMX range. This enables control of up to 23 products in the 16-channel personality.

Programming

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press **<MENU>** repeatedly until the option shows on the display. Press **<ENTER>** to select. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press **<UP>** or **<DOWN>** until the option shows on the display. Press **<ENTER>** to select. In this case, if there is another programming level, you will see that first option, or you will see the selected value.
- Press **<MENU>** repeatedly to exit to the previous main level.

Menu Map

Refer to the Ovation CYC 1 FC product page on www.chauvetprofessional.com for the latest menu map

Configuration (DMX)

Use DMX configurations to operate the product with a DMX controller.

DMX Personalities

This setting allows you to choose a particular DMX personality.

1. Go to the **DMX Channel** main level.
2. Select the desired personality (**1Ch, 3Ch, 5Ch, 7Ch, 10Ch, 12Ch, 13Ch, 16Ch, or HSV**).

- See the [DMX Control](#) section for the highest starting address you can select for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

DMX Control

In this mode, each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison.

1. Select a DMX personality as shown in [DMX Personalities](#).
2. Set the running mode:
 - a. Go to the **Master/Slave** main level
 - b. Select the **Master** programming level
3. Set the starting address:
 - a. Go to **Start Address** main level.
 - b. Select the starting address (**001–512**).

The highest recommended starting address for each DMX personality is as follows:

DMX Personality	Starting Address
16Ch	497
13Ch	500
12Ch	501
10Ch	503
7Ch	506
5Ch	508
3Ch	510
1Ch	512
HSV	510

3	Value	000 ⇄ 255	0–100%

Virtual Color Wheel

The Ovation CYC 1 FC includes a feature called the Virtual Color Wheel (VCW). This feature is available as a standalone control mode for manual use and as a control channel in select DMX personalities. More than 30 premixed colors, custom blended by Chauvet engineers, are available to call up for easier programming. The DMX values used to mix these colors are provided below. The overall intensity of the Ovation fixture can be adjusted to more closely replicate familiar colors. A chart is available on Chauvet website www.chauvetprofessional.com to compare Chauvet's pre-mixed colors with popular gel colors. This chart is for comparison purposes only and is not a representation that Chauvet pre-mixed colors match any of the gel colors listed.

226 ⇄ 255	--	000	000	000	000	000

The color temperatures above are simulated renditions of the color output produced compared with a tungsten lamp at the specified color temperature. Chauvet makes no guarantee of the color output accuracy.

Configuration (Standalone)

Use standalone configuration to operate the product without a DMX controller.

Auto Programs

Auto programs allow for dynamic RGBAL color mixing without a DMX controller.

1. Go to the **Auto Show** main level.
2. Select the desired auto (**Auto 1–5**).
3. Select the desired speed (**Speed 001–100**).

The auto programs cannot be edited.

Red Shift

The Red Shift function allows the light in the fixture to mimic halogen lamp dimming. To enable or disable the Red Shift function:

1. Go to the **Red Shift** main level.
2. Select from **On** (enables Red Shift) or **Off** (disables Red Shift).

Master/Slave

The Master/Slave mode allows a group of Ovation CYC 1 FC products (the slaves) to simultaneously duplicate the output of another Ovation CYC 1 FC (the master) without a DMX controller.

To set each of the slaves:

1. Go to the **Master/Slave** main level.
2. Select **Slave**.

To set the master:

1. Go to the **Master/Slave** main level.
2. Select **Master**.
3. Select an auto program (see [Auto Programs](#) or [Virtual Color Wheel Chart](#)).

- The master is the one that runs a program whether in Auto Program or VCW modes.
- Do not connect a DMX controller to the products configured for Master/Slave operation. The DMX controller may interfere with signals from the master.
- The master should be the first product in the daisy chain.

Operation

White Balance

This setting allows for selection of the white balance shown by the Ovation CYC 1 FC when the color setting is **RGBAL** and the DMX controller's red, green, blue, amber, and lime faders are set to **255**.

1. Go to the **White Balance** main level.
2. Select **Manual** to continue to adjust the white balance or **Off** to default to the original factory setting.
3. Select a color (**Red, Green, Blue, Amber** or **Lime**).
4. Select a color value (**125–255**).
5. Repeat for the other colors.

The values of **Red, Green, Blue, Amber** and **Lime** configured will define the color temperature shown when the **RGBAL** faders are set to **255**.

Virtual Color Wheel

The Virtual Color Wheel mode allows for preset popular colors RGBAL color mixing without a DMX controller.

1. Go to the **Virtual Color Wheel** main level.
2. Select **Virtual Color Wheel**.
3. Select the desired color from the [Virtual Color Wheel Chart](#).
4. Press **<ENTER>** twice.
5. Select the **Dimmer** value (**000–255**).
6. Press **<ENTER>**.

Color Temperature

The color temperature mode allows for permanent white color temperature presets without a DMX controller.

1. Go to the **Virtual Color Wheel** main level.
2. Select **Color Temperature**.
3. Select the **Dimmer** value (**000–255**).
4. Select the desired color temperature.

Manual Color Mixer

The Manual Color Mixer mode allows for permanent RGBAL color mixing without a DMX controller.

1. Go to the **Virtual Color Wheel** main level.
2. Select **Manual Color Mixer**.
3. Select the desired color (**Red, Green, Blue, Amber**, or **Lime**).
4. Select the color value (**000–255**).
5. Repeat for the other colors.

Dimmer Curve

To set the dimmer curve on the Ovation CYC 1 FC:

1. Go to the **Dimmer Curve** main level.
2. Select the dimmer curve (**S Curve, Linear, Index Curve**, or **Log Curve**).

Dimmer Profiles

This setting determines how fast the output of the Ovation CYC 1 FC changes when you modify the values of the red, green, blue, amber, lime, and dimmer faders. This setting provides four different options to simulate the dimming curve of an incandescent lighting product.

- Go to the **Dimmer Mode** main level.
- Select a dimmer curve (**OFF, Dimmer 1, Dimmer 2**, or **Dimmer 3**).

OFF: The output is proportional (linear) to the dimmer and RGBAL channel values.

Dimmer 1-3: The output follows the dimmer and RGBAL channel values based on the corresponding dimmer curve, DIM1 being the fastest.

White Balance

This function allows users to manually configure the white balance settings

1. Go to the **White Balance** main level.
2. Select **Off** (factory-default white setting) or **Manual** (manually adjust RGBAL settings).
3. For **Manual** settings, select the desired color (**Red, Green, Blue, Amber**, or **Lime**).
4. Select the color value (**125–255**).
5. Repeat for the other colors.

LED Frequency

This option changes the Pulse Width Modulation (PWM) frequency of the LEDs on the Ovation CYC 1 FC.

1. Go to the **LED Frequency** main level.
2. Select PWM Frequency (**600Hz**, **1200Hz**, **2000Hz**, **4000Hz**, **6000Hz**, or **25Khz**).

Back Light

This setting allows for the selection of the amount of time the backlight on the Ovation CYC 1 FC's display stays on after the last button is pressed on the control panel.

1. Go to the **Back Light** main level.
2. Select **10S** (10 seconds), **30S** (seconds), **2Min** (2 minutes), or **On** (remains on).

System Information

The information section of the menu displays statistics and the current status of the product's various functions. To view these information sections:

1. Go to the **Information** main level.
2. Select which information to view, from **Fixture Hours** (displays the total number of hours the product has been turned on), **LED Hours** (displays the total number of hours the LEDs have been powered on), **Version** (displays the installed software version), or **UID** (displays the product's UID number).

Factory Reset

This option restores the Ovation CYC 1 FC to the original factory settings.

1. Go to the **Factory Setting** main level.
2. Select **Yes** (resets the product configuration to default factory settings) or **No** (cancel).

5. Technical Information

Product Maintenance

To maintain optimum performance and minimize wear, clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.

Clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.

To clean the product:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint-free cotton cloth or a lens-cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

Returns

Returns

Send the product prepaid, in the original box, and with the original packing and accessories. Chauvet will not issue call tags.

Call Chauvet and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause(s) for the return.

To submit a service request online, go to www.chauvetprofessional.com/service-request.

Clearly label the package with an RMA number. Chauvet will refuse any product returned without an RMA number.

Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Once you have the RMA number, provide the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned product(s).
